DEPARTMENT OF COMPUTER SYSTEMS ENGINEERING
Piraeus University of Applied Sciences

SOFT SKILLS

Problem Solver
Self-Motivated
Team Player

JOB EXPERIENCE

WEB DEVELOPER / TECHNICAL CONSULTANT
Lighthouse S.A (2019 - Present)

- Analyze new feature requirements, clients requests, estimate effort, and contribute to technical planning.

- Debugging and support activities across multiple client-facing systems.

- Develop frontend features and integrate with backend APIs.

- Collaborate with cross-functional teams to deliver scalable and maintainable code.

- Work closely with QA and DevOps to ensure CI/CD workflows and deployment readiness.

Key Highlights:
- Bridged the gap between technical and commercial teams, improving communication and proposal accuracy.

- Effectively organized and analyzed multiple demanding projects to meet tight deadlines, delivering high-quality outcomes with minimal issues on production release.

WEB DEVELOPER / TEAM LEADER
Just in Time Digital Agency (2016 - 2019)

- Developed and maintained client websites using WordPress, custom plugins and custom made projects and business tools.

- Managed small development team, project analysis, estimations, assigning tasks and reviewing deliverables.

- Participated in sales meetings and client presentations, contributing technical insights and showcasing product demos. Assisted the sales department with proposal preparation, feature breakdowns, and cost/time estimations.
